

Seminar Date: Wednesday 6th October 2010
Venue: The CSIR International Conventional Centre, Pretoria
Registration: 07h30 – 08h00

Presented by **Honeywell**

The Sustainable Energy Seminar 2010. An event that provides practical solutions for South African energy stakeholders.

The Sustainable Energy Seminar will bring together the country's leading energy stakeholders who will be playing meaningful roles in either initiating energy efficiency and renewable energy projects and policy or specifying and manufacturing the products and technologies that will change the way we deal with energy in South Africa. Top South African and International presentations and focused workshop sessions will be presented at this 1-day Seminar which will be held at the CSIR Convention Centre in Pretoria on the 6th October 2010. The Seminar will be accompanied by an exhibition of industry products and services and delegates will be able to network with the country's sector decision-makers as they enjoy a tea and lunch service between sessions.

A boutique exhibition area of leading product and service providers will complement the agenda to which delegates and exhibitors are able to network, engage and do business:

Interact personally with South Africa's leading energy sector stakeholders, policy-makers, designers and specifiers

such as: Property Owners, Engineers, Environmental Designers, Urban and Town Planners, Architects, Building Certification Professionals, Technologists, Facilities Managers, Plant Engineers, Government Managers and DG's, City Managers, Municipal Managers, Utilities managers and consultants, Commercial Property Owners and Developers, Heavy Industry Private Sector, Heavy Industry Public/Parastatal/Mining, Corporate Commercial Managers, Academia and Research Institutes, Councils and Voluntary Associations.

Presentations will contribute practically to some of the most important energy/ electricity discourses in South Africa which include but are not limited to the following themes. In each instance presenters will attempt to incorporate environmental, economic and social impacts:

- The South African context
- The ideal sustainable energy vision
- Energy Efficiency
- Energy as a key element of sustainability
- New Developments in the wholesale electricity market to allow regeneration
- New Developments in Electricity Transmission and Distribution
- New Developments in Renewable Energy in South Africa

- New Developments in Energy Efficiency
- New Financial Models for Energy Efficiency in Buildings
- New Technologies for Energy Efficiency
- University of Johannesburg Campus Retrofit for EE Case Study

Benefits:

- Be exposed to projects emerging from government and public sector stakeholders
- Valuable CPD accreditation
- Network directly with International and National energy experts.

Additional Value for attending delegates:

The Seminar will also host the official launch of the Sustainable Energy Resource Handbook and all attending delegates will receive a complimentary copy along with other white papers and presentations in delegate packs.

Attending delegates will each receive **free** course registration for 2 x Eco-building eLearning Modules valued at R700 (Validated by SACAP for 1 x category 1 CPD). Please see www.alive2green.com/education for more details

Delegate Rate: R2450
